PRINCIPAL'S DESK

As one amongst you, I understand and appreciate the most difficult and challenging task ahead of us. Shaping the destiny of a child is a matter of great pride for each one of us. The main object of education is the establishment of a twofold harmony in every individual - harmony within his own self and harmony with other living beings in the world. So our goal has always been the personality enrichment through curricular and co-curricular activities.

Teaching is much more than a career or a profession. It (teaching) is the most onerous responsibility of molding and shaping a child into a responsible citizen. I am certain my students will become the productive, Intelligent and honest citizens of society.

The active participation and co-operation of parents would be extremely essential to achieve the desired results. We strive with in-dominate zeal to seek fresh vistas of excellence so as to enable our students to become self-restrained and come out with flying colors in the present age of competition.
